

iFILTRATION® HF Series

The **iFILTRATION HF** series **High-Flow** filter cartridge (OD: 6 inches) is made of pleated multi-layer filter media. The outer cage, inner core, and cap are made of polypropylene. We use thermal melting technology for each seal without adhesives to prevent leakage and pollution and ensure a good sealing effect. The unique design allows for a high contaminant loading capacity for better depth filtration, provides reliable performance, optimizes the filtration area, dramatically reduces the number of filter cartridges and the filter housing size, and is widely used in various applications.

FEATURES
